Work Experience

JANA Corporation

Aurora, Canada

SOFTWARE DEVELOPER 1

August 2024 - Current

- Led a team of 4 to architect and ship a GIS field iOS app from greenfield to production in **4 months**, delivering Azure AD auth, ArcGIS mapping, GPS tracking, and dynamic field forms
- Authored org-wide prompt engineering guidelines and LLM workflow practices adopted by 3 teams, presenting to **130+** employees and establishing the Lantern iOS project as the reference implementation for AI integration
- Led end-to-end web performance initiative from traffic profiling to executive presentation, reducing server load by **37%** and response times by **75%**
- Owned all 4 team CI/CD pipelines (iOS, Android, FE, BE) in the absence of dedicated ops, automating iOS deployment to App Store Connect, Android builds to Azure, and integrating JANA's platform API across web pipelines
- Championed unit testing on the Lantern iOS app from scratch, authoring **489 tests** and enforced **80%** minimum coverage via SonarQube quality gates, establishing the team's first automated test standard
- Resolved an ArcGIS backend bottleneck by implementing Memcached with R-tree spatial indexing, cutting geospatial query wait times from up to **5 minutes** to under **20 seconds** for repeated extent-based requests

JANA Corporation

Aurora, Canada

JUNIOR SOFTWARE DEVELOPER

May 2022 - August 2024

- Developed a **Kotlin** Android Application using **ArcGIS** for users to conduct Gas Pipeline Security fieldwork
- Led feature expansion of Gas Pipeline Security surveying work types as a 2-person team, directly contributing to **\$1.3M** in new client revenue and accelerating promotion to Software Developer 1
- Reduced data sync time by up to **72%** by implementing a producer-consumer concurrency pattern, eliminating blocking operations in the sync pipeline
- Refactored monolithic architecture with a repository layer and dependency injection, increasing test coverage by **30%** and enabling isolated unit testing per layer
- Built automated crash detection and alerting pipeline using Firebase and JIRA, cutting Mean-Time-to-Detect by **60%** and enabling same-day triage for production issues

Education

The University of Toronto

Toronto, Canada

H.B.SC IN COMPUTER SCIENCE

Sep 2017 - June 2023

Certificates AWS Solutions Architect Associate

Skills

CI/CD & DevOps	Github Actions, Azure Pipelines, SonarQube, Docker
Cloud	AWS, Azure
Mobile	Swift (iOS), Kotlin (Android), ArcGIS Maps SDK
Languages	TypeScript, Python, Java, C#, C
Web	React, Redux, Node.js, Express, .NET
Data	PostgreSQL, MongoDB, Memcached, SQL, Firebase
